Next.js	SQL	Drupal	Webpack/Gulp/Grunt
HTML5		WordPress	VSCode
CSS3/SASS/PostCSS		Gatsby	Oxygen XML Editor
Tailwind CSS		Hugo	Salesforce Commerce Cloud
Styled Components			AWS
YAML			Azure Cloud
XML			Confluence
RESTful/JSON API			JIRA

EXPERIENCE

Glentel Inc. | Front End-Web Developer | Toronto

December 2020 - Present

- Lead developer responsible for maintaining Glentel's web properties (**Costco Mobility, Wireless Wave, and Tbooth Wireless**)
- Designed and implemented new features and functionalities for the eCommerce sites using React.js/Next.js and Sanity CMS
- Architected and built scalable custom CMS templates for marketing campaigns, promotions, and web banners
- Assessed technical feasibility and prototyped software solutions using cutting-edge front-end technologies
- Performed code reviews and managed code deployment through Azure DevOps CI/CD pipelines
- Mentored junior front-end engineers and contributed to their technical growth and development.

Canada Goose | Front-End Developer | Toronto**April 2017 – December 2020**

- Designed and built scalable and secure user experiences for high-traffic websites with a global footprint across 13+ countries
- Ensured platform-agnostic design implementations for maximum compatibility and user accessibility
- Led an international team of cross-functional collaborators, including software engineers, UX designers, product managers, and partners
- Facilitated continuous improvement through CI/CD pipelines and test automation
- Utilized Azure cloud for optimized performance through CDN global edge endpoint web optimization

Intelix | Web Application Developer | Toronto**April 2015 – Feb 2017**

- Developed highly scalable SAAS applications serving over 1.3 million users globally
- Responsible for end-to-end design and implementation of key UX/UI deliverables, ensuring consistency across all offerings
- Maintained platform-agnostic solutions for scalable performance on Mobile (Android/iOS) and web environments
- Employed automated testing and deployment through git push to CI/CD pipelines
- Utilized industry-recognized CMS solutions and their respective APIs, along with CDN technologies, for robust and low-latency optimization for static and geo-edge locations.

Synergy Networkx | Front End Developer | Toronto**March 2014 - March 2015**

Responsible for end-to-end UI/UX development and implementation of a SAAS based Hedge Fund Investment Relations Platform and Hosting Company.

Responsible for front end programming and developing custom websites

- Utilized HTML5/CSS3/XML with PHP
- Developed mobile websites using WordPress CMS / Drupal CMS
- Developed custom websites for hedge funds and pharmaceutical clients

Index Exchange | Front End Web Developer | Toronto**Jan 2013 - April 2013**

As a contractor for multi-national advertising and technology automation company for real-time transaction ad impressions I was responsible for front end programming and developing dynamic web applications.

- leveraged HTML5/CSS3, JavaScript, and JSON to develop dynamic and engaging web pages
- Developed and tested applications with multiple browsers and devices, including smartphones and tablets

Ontario Securities Commission | Web Developer | Toronto | Internship**July 2012 - Aug 2012**

As an Intern I was tasked with updating the company's online presence

- Maintained and updated the company's website using HTML5 and the Open Text CMS platform
- Oversaw production, modification, and maintenance of website user interface
- Ensured a seamless and user-friendly experience for visitors

EDUCATION**University of Toronto | CWCC | Toronto****Humber College | Post Graduate Certificate in Web Development | Toronto**

Web Application Development (ASP.NET, PHP, JavaScript) Database Design and Development (Oracle, MS SQL, MySQL) XML and Web Services

BSc, Technology | St. Petersburg Institute of Economic Relations | Russia**References: Available Upon Request**
